how to install

Make sure you have the latest version of Diva installed. You need at least Diva v1.3 to be able to use these sounds.

Getting the sounds into Diva is easy.

In your unzipped archive (where you found this file) there is a folder called 'Plughugger Twilight 3'.

Copy this folder.

Mac: paste this folder into: Macintosh HD/Library/Audio/Presets/u- he/Diva/THIRD PARTY.

PC: go to the VST folder where you installed Diva. Then paste the folder into Diva.data\Presets\Diva \THIRD PARTY.

about the sounds

Twilight 3 - Dawn of Analog is a soundsset that focuses on the golden age of vintage analog synthesizers.

The majority of the sounds are pads, followed closely by arpeggios and leads, and our design goal was to create the direct opposite of the previous Twilight soundssets: an analog soundset packed with beautiful and uplifting sounds.

No dark, moody or scary sounds in this collection.
Just pure analog bliss.
Something u-he Diva truly excels at.

license agreement

Please read the terms of the following agreement before using this software.

The sounds that came with this agreement are the property of Plughugger, which in turn is the property of Carl Löfgren. The sounds are licensed – not sold – to you, for use in your music productions.

The right to use enclosed sounds is only granted to the original end-user of the product. This right is not transferable – which means you cannot sell these sounds second hand. If the product is sold, yours and the buyers license are no longer valid.

All lending, renting, copying, duplicating, trading or reselling of this product or its contents is naturally not allowed. You may neither upload or download this product or any sounds from it, on the Internet.

You can use the sounds in any type of *commercial or private music production* without permission or paying any further fees than the original price of the product. You may modify the sounds to your needs. The only restriction is that you must not use the sounds in an isolated manner – for public releases the sound must always be used in a musical context. You are not allowed to create a sample library based on the sounds you purchase from Plughugger.

The sounds provided are licensed "as is" without warranties of any kind. Neither the producer, nor Plughugger can be held responsible for any direct or indirect or consequential loss arising from the use of this product in whatever form.

technique for omnisphere 2

Technique is the first soundsset in our new series where we focus on one popular synthesizer. With Technique we used the British monophonic synthesizer CRAFTsynth and developed over 200 new sounds for Omnisphere.

Be sure to check out the demo at plughugger.com.
